Dear Dr Sowell,

Thank you for contributing to our society and illuminating the (so far) intractable multi-generational conflict of visions which plagues our times.

Your writings blend thoughtfully history, economics, philosophy, and law in a way that's equal parts informative, insightful, and engaging.

By your example, I am taking up now as one of my personal goals in life to advance your observations about this bedrock conflict of visions and broker constructive conversations with both sides. As we must reconcile internal struggles within our own personhood, surely there is way at the societal level to honor both visions without jeopardizing our great experiment.

Thank you again for your lifelong service to freedom and the truth. I appreciate you.

John Bicknell
